## DETAILS - FEATURES AND OPTIONS

### POSTS

Folding Access Control partition's unique free standing design requires no ceiling or floor track and quickly positions in place.

**1** Wall Channel - A full height extruded piece of aluminum that the Lead Post fits and locks into. This Channel is secured permanently to the wall.

**2** Lead Post - With cylinders secure side and public side activating hook bolt lock engaging wall channel.

- 3** Bi-Part - Joins together two sections of Roll and Folds. With cylinders secure side and public side.
- 10** Fixes the end of a door permanently to a wall or structure.
- 13** Mounting Tube - 3 in. x 3 in. x 6 ft. 6 in. steel tube with 5 in. x 7 in. steel floor base.

## STORAGE

The Folding Access Control Partition stacks smaller than the traditional portable scissors gate. Below is an example of the space savings.

### EXAMPLE: 55 FT. WIDE OPENING

|               | Width x Depth   | Storage Area  |
|---------------|-----------------|---------------|
| Roll and Fold | 36 in. x 32 in. | 10.67 sq. ft. |
| Scissors Gate | 82 in. x 30 in. | 17.08 sq. ft. |

GlassEssential

## LAYOUTS

Typical layout connects to wall at one end and mounting tube at other end. Layout can have multiple sections.

Layouts with more than seven sections should be biparted into two sections.

- |    |  |
